To the Organizing Committee of the FASMI–MISI Biennial Conference 2026

It is my pleasure to provide this letter of support for the FASMI–MISI Biennial Conference 2026, to be held October 26–28, 2026, at Osmania University in Hyderabad, India.

As President of the World Molecular Imaging Society (WMIS), I strongly support initiatives that promote scientific collaboration, education, innovation, and interdisciplinary exchange in molecular imaging and related biomedical sciences. The FASMI–MISI conference represents an important international platform that brings together investigators, clinicians, engineers, trainees, and industry partners to advance the field of molecular imaging and its translational applications.

The mission of this conference is particularly timely and important. Molecular imaging continues to play a transformative role in improving our understanding of disease biology, enabling early diagnosis, guiding therapeutic interventions, and accelerating the development of precision medicine approaches. Conferences such as FASMI–MISI are essential for fostering collaboration across institutions, disciplines, and countries, while also supporting the next generation of scientists and clinicians in Asia and beyond.

I would also like to recognize the outstanding efforts of the organizing committee and the leadership of FASMI and MISI in promoting excellence in research and education. Their commitment to building a vibrant scientific community and strengthening global partnerships will undoubtedly contribute to the success and impact of this meeting.

I am confident that the FASMI–MISI Biennial Conference 2026 will provide an exceptional scientific program and meaningful opportunities for collaboration and professional development. I fully support this important initiative and wish the organizers and participants a highly successful and productive conference.

Sincerely,

Anna Moore, PhD
President
World Molecular Imaging Society (WMIS)
